

Graduate Advising Best Practices

Preamble

The relationship between a graduate student and advisor is one that can greatly impact the academic achievements and life of a graduate student. This relationship has the potential to greatly encourage the academic pursuits of the graduate student, proving to be one of the most influential interactions of the scholar's life. However, a relationship in which mutual expectations are not understood has the ability to diminish a graduate student's potential. Ultimately graduate advising must be viewed as a relationship with two vested parties both with the expectations that the other party will fulfill certain, often unwritten, best practices.

Purpose

This document is meant to be a spring board for discussions to occur at the departmental level to develop or reevaluate specific graduate advising standards that departments set forth. Therefore, the purpose of this document is to bridge disciplines and outline minimal best practices of graduate advising at The Ohio State University.

Best Practices

Graduate Student

- Conduct academic pursuits in an ethical manner while developing professionalism by:
 - upholding the Student Code of Conduct (<http://sja.osu.edu/page.asp?id=1>), including, but not limited to, sections explicitly related to academic pursuits
 - pursuing opportunities that would advance career as a graduate student and beyond
- Take ownership of academic progress by:
 - devoting significant and productive time toward degree
 - staying abreast of requirements toward degree completion by actively and often discussing these issues with the advisor
 - clearly communicating career goals and concerns related to academic progress
 - taking an active role in initiating communication with the advisor

It is recommended that as much communication as possible occur in person or over the phone. Such communication enhances clarity, reduces ambiguity and misunderstanding, and often is singularly sufficient to resolve conflict. Written communication, e.g. via mail and e-mail, is appropriate, including to document potentially contentious issues. However, e-mail is prone to misunderstandings.

 - Recognize that social media can blur the line between professional and personal lives and therefore should be only used if deemed appropriate by both parties.
 - Clearly and immediately address any problems that arise so that both parties can work to remedy issues in an expedient manner.
- Respect the vast responsibilities of the advisor by:
 - maintaining open communication through phone, e-mail, conference call, web chat, etc. when face-to-face communication is not possible
 - allowing significant time for the advisor to provide feedback in advance of pending deadlines

- maintaining professionalism by keeping up with graduate student responsibilities even when advisor is not present

Graduate Advisor

- Conduct advising in an ethical manner by:
 - ensuring that new advisees are not recruited under false pretences
 - Including but not limited to, accepting students with the future intention to leave current position, misleading the students on the amount of funding available for student support to degree completion, providing unrealistic projections of time to completion, and unrealistic publication expectations.
 - interacting with graduate students in a way that is not considered discriminatory, as defined by law or applicable University policy.
 - maintaining communication with graduate students in a professional and civil manner. This includes, but is not limited to:
 - Clearly stating expectations and requirements for students. This may most effectively be done in written form, even if just a written summary of an in-person meeting.
 - Providing periodic (e.g. quarterly or annually), clear expectations of progress toward degree as well as evaluation of progress.
 - Providing written feedback on student professional writing in a timely manner to promote student progress.
 - Recognizing that social media can blur the line between professional and personal lives and therefore should only be used if deemed appropriate by both parties.
 - Clearly and immediately addressing any problems that arise so that both parties can work to remedy issues in an expedient manner.
 - giving students appropriate credit for work done, e.g. as reflected in author strings in journal articles or books.
- Aid in preparing students to be the best professional they can be by:
 - actively initiating communication with advisee not only about academic progress, but career goals
 - supporting traditional and non-traditional career goals
 - helping graduate students develop professional skills that will make them competitive for employment for their given field
 - encouraging students to take part in activities that will enrich their academic development, e.g. by participating in professional conferences and other networking activities
 - staying abreast of requirements toward degree completion and discussing completion of these requirements often with advisee
- Respect that students may have non-academic responsibilities by:
 - providing prompt and honest feedback on student's work
 - allowing reasonable time for students to prepare requested materials

- not requiring that a student continue to provide a service (e.g. teaching, laboratory management, mentoring of other students, etc.) beyond departmental norms that can hinder a student's degree completion

Recommended Reading

We recommend that, in addition to these Graduate Advising Best Practices, advisors and advisees make themselves aware of other documents that affect their relationship, such as the "Graduate School Guidelines: Advising and Mentoring Graduate Students" and documents specific to their department.

Conclusions

Great academic strides can be made when two or more minds come together, which makes the graduate advising relationship one of great importance for the advancement of one's field. Support of "Graduate Advising Best Practices" by parties with a vested interest in graduate advising sends a message of support for graduate students' academic and professional pursuits, which ultimately is of great importance to The Ohio State University.

We recognize and appreciate all of the work by the following organizations and institutions that laid the groundwork for this document: University of Oregon Graduate Council, University of California Davis Graduate School, University of Arizona Graduate College and Graduate Council, University of Southern California Office of Graduate Studies, North Carolina State University Graduate School, University of Washington Graduate School, University of Missouri Columbia Graduate School, the University of Nebraska Lincoln, and an *ad hoc* committee of The Ohio State University Graduate School's Graduate Council.
